- Draft save
- Preview
- Publish

3.2 Use Cases

UC-2: Create Company

Actor	Super Admin
Flow	Fill → Save
Output	Company created

UC-3: Edit Company

Actor	Company Admin
Constraint	Own company only
Flow	Update → Save
Output	Updated profile

3.3 User Stories

- As a super admin, I want to onboard companies
- As a company admin, I want to enrich my profile
- As a company, I want to attract talent

4. MODULE 3: COMPANY USER MANAGEMENT

4.1 Screen Behavior (Screen 9)

Layout:

- Left → Departments
- Right → Users in department

4.1 Functional Requirements

FR-30: Department Management

- Add department
- Search department
- Select department

FR-31: User Listing

Columns:

- Name
- Designation (NOT role)
- Email
- Phone
- Actions

FR-32: Add User

- Add new user to department

FR-33: Edit User

- Update user details

FR-34: Delete User

- Soft delete (archive)

FR-35: Pagination

- Paginated list

4.2 Use Cases

UC-4: Create Department

UC-5: Add Company User

UC-6: Manage Users

4.3 User Stories

- As a company admin, I want to structure my org
- As a company admin, I want to assign contacts
- As a system, I want reusable user identity

📦 POSTGRES SCHEMA (DDD ALIGNED)

1. COMPANY CORE

```
CREATE TABLE companies (
      id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
      name TEXT NOT NULL,
      logo_url TEXT,
      industry TEXT,
      location TEXT,
      company_type TEXT, -- PRIVATE / PUBLIC / PSU
      established_year INT,
      description TEXT,
      created_at TIMESTAMP DEFAULT NOW(),
      updated_at TIMESTAMP DEFAULT NOW()
);
```

2. COMPANY MEDIA (REUSE SAME PATTERN)

```
CREATE TABLE company_media (
      id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
      company_id UUID REFERENCES companies(id) ON DELETE CASCADE,
      media_id UUID REFERENCES media_assets(id) ON DELETE CASCADE,
      category TEXT,
      -- BROCHURE / VIDEO / GALLERY / TESTIMONIAL
      display_order INT
);
```

3. CLUB ASSOCIATION

```
CREATE TABLE company_clubs (
      id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
      company_id UUID REFERENCES companies(id),
      club_id UUID REFERENCES clubs(id),
      is_parent BOOLEAN DEFAULT FALSE
);
```

4. COMPANY SERVICES (STRUCTURED FIX)

```
CREATE TABLE company_services (
      id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
      company_id UUID REFERENCES companies(id),
      category TEXT, -- CLOUD / AI / CYBERSECURITY
      description TEXT
);
```

5. COMPANY PRODUCTS

```
CREATE TABLE company_products (
      id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
      company_id UUID REFERENCES companies(id),
      name TEXT,
```

```
      description TEXT
);
```

6. COMPANY CONTACTS

```
CREATE TABLE company_contacts (
      id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
      company_id UUID REFERENCES companies(id),
      user_id UUID REFERENCES users(id),
      contact_type TEXT
      -- HR / RECRUITER / TRAINING / MENTOR
);
```

7. HIRING / RECRUITMENT (STRUCTURED — VERY IMPORTANT)

```
CREATE TABLE company_hiring_stats (
      id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
      company_id UUID REFERENCES companies(id),
      year INT,
      hires INT,
      internship_conversion_rate NUMERIC,
      created_at TIMESTAMP DEFAULT NOW()
);
```

Hiring Roles

```
CREATE TABLE company_hiring_roles (
      id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
      company_id UUID REFERENCES companies(id),
      role_name TEXT
);
```

Hiring Domains

```
CREATE TABLE company_hiring_domains (
      id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
      company_id UUID REFERENCES companies(id),
      domain TEXT
);
```

Compensation

```
CREATE TABLE company_compensation_stats (
      id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
      company_id UUID REFERENCES companies(id),
      year INT,
      highest_package NUMERIC,
```

```
      average_package NUMERIC
);
```

8. DEPARTMENTS (NEW DOMAIN)

```
CREATE TABLE departments (
      id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
      company_id UUID REFERENCES companies(id),
      name TEXT NOT NULL
);
```

9. COMPANY USERS (BRIDGE TO USERS)

```
CREATE TABLE company_user_profiles (
      id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
      user_id UUID REFERENCES users(id),
      company_id UUID REFERENCES companies(id),
      department_id UUID REFERENCES departments(id),
      designation TEXT,
      is_active BOOLEAN DEFAULT TRUE
);
```

10. ROLE + CONTEXT (REUSE YOUR CORE MODEL)

Example:

```
-- Company Admin
context_type = 'COMPANY'
context_id = company_id
role = COMPANY_ADMIN
```

🔗 FINAL ARCHITECTURE VIEW

```
