LOG BOOK

Ethan Carter

Club Points : 120

Email-id : ethancarter@gmail.com

College : California Institute of Technology

Phone No. : 9XXXXXXXX6

Course : B.Tech in Computer Science

Internship ID : INT-3478

Intern Position Name : UI/UX Intern

Duration : 3 Months

Rank : 5th out of 100 applicants

Department : Software Development

Location : Mumbai, India

Chief Mentor : Sameer Kulkarni

Structured Week Wise Activities

Total No. of Weeks: 6

Primary Work Objective: Coal Receiving System

Assigned Internship Co-ordinator: Adarsh Singh

Capability Instance: Unloading Arms+Compliance & Safety+L3

No. of Weeks: 4

Week 1

Skills:

Unloading Arms+Compliance & Safety+L3+Wagon Tippler Basics, Coal Unloading Awareness, Equipment Identification, Material Flow Understanding, Safety Awareness

Task

1. Observe and document the wagon tippler coal unloading process from wagon positioning to coal discharge.

Evidence: Process flow document or report

View

2. Identify major coal unloading equipment such as Wagon Tippler, Track Hopper, Crushers, and Conveyors.

Evidence: Equipment identification sheet

View

3. Create a material flow diagram showing how coal moves from wagon tippler → hopper → crusher → conveyor → storage yard/bunker.

Evidence: Review approval from supervisor

3. Perform a safety compliance check for unloading area (PPE usage, emergency stop systems, barricading, warning signs).

Evidence: Safety compliance report

View

Student Reflection

In Week 1, I gained a foundational understanding of the key concepts and expectations for this course. The discussions and activities helped me engage with new perspectives and think critically.

Trainer Feedback

2. OVERALL DESCRIPTION

2.1 Product Perspective

The Internship Module is a subsystem within the Whizard ecosystem.

It interacts with:

- User Management System
- Organization Management System
- Capability Framework Engine
- Assessment Engine
- Certification Engine
- Notification Service

It is a service-oriented backend with web and mobile interfaces.

2.2 Product Functions

High-level functions include:

1. Internship creation & publishing
2. Screening & eligibility filtering
3. Assessment configuration
4. Interview scheduling
5. Offer letter generation
6. Skill-task configuration
7. Weekly execution tracking
8. Evidence validation
9. Logbook auto-generation
10. Certification issuance
11. Progress tracking dashboard

2.3 User Classes and Characteristics

2.3.1 Student

- Applies for internship
- Uploads evidence
- Submits reflections
- Views progress

2.3.2 Company HR

- Creates internships
- Configures screening
- Reviews applicants
- Shortlist candidates
- Schedule interviews
- Record interview outcomes
- Issues offers

2.3.3 Company Mentor

- Mentors candidate, provides weekly feedback
- Validates evidence
- Mid-term feedback
- Final evaluation
- Capability ratings
- Internship performance score

2.3.4 College Placement Officer

- Monitors student participation
- Tracks progress
- Accesses logbooks

2.3.5 System Administrator

- Manages framework & configuration

2.4 Design and Implementation Constraints

- Must support RBAC
- Must maintain audit logs for validation
- Must support large capability datasets (1000+ tasks per functional group)
- Must support multi-organization isolation
- Must ensure safety-critical validation logging

2.5 Assumptions and Dependencies

- WRCF is pre-defined or AI-generated
- Assessment Module exists
- Certification Engine exists
- Student entity already maintains club points

3. SPECIFIC REQUIREMENTS

3.1 Functional Requirements

3.1.1 Internship Creation

FR-1: System shall allow HR to create internship.

FR-2: Internship shall contain:

- Role / Position Title
- Description
- Role Overview
- Responsibilities
- Timeline
- Work Schedule
- Benefits
- Selection Process

FR-3: Internship shall be linkable to predefined Role Competency, (Assigned Capability Instances from Industry / Company role)

FR-4: System shall allow internship status transitions (Draft → Published).

3.1.2 Screening Criteria

FR-5: HR shall define eligibility criteria:

- Minimum club points
- Minimum projects
- Minimum internships

- Minimum certification level

FR-6: System shall auto-validate students against eligibility.

FR-7: System shall display eligible candidate count.

FR-8: HR shall define a screening questionnaire.

3.1.3 Assessment

FR-9: Internship shall allow attachment of assessment.

FR-10: System shall enforce minimum assessment score.

FR-11: System shall allow assessment weightage configuration.

3.1.4 Interview

FR-12: System shall allow configuration of interview rubric.

FR-13: System shall allow panel creation.

FR-14: System shall auto-generate interview schedule matrix.

FR-15: System shall allow bulk scheduling.

FR-16: System shall allow rescheduling.

3.1.5 Selection

FR-17: System shall compute final selection score:

Final Score = (Assessment × Weightage) + (Interview × Weightage)

FR-18: System shall allow HR to override selection manually.

FR-19: System shall allow offer letter generation via template.

FR-20: System shall track offer acceptance.

3.1.6 Internship Execution

FR-21: Internship is for a certain position (role). Role will be mapped to:

- Functional Group [Singl or Multiple]
- PWO [Singl or Multiple]
- Capability Instance (SWO + Capability + Proficiency) [Multiple]

FR-22: System shall auto-load skills and tasks associated with the Capability Instances

FR-23: Student shall upload evidence per task.

FR-24: Mentor shall validate evidence (Approve/Reject).

FR-25: System shall update skill completion upon validation.

FR-26: Student shall submit weekly reflection.

FR-27: Mentor shall provide weekly feedback.

3.1.7 Logbook

FR-28: System shall auto-generate logbook.

FR-29: Logbook shall include:

- Weekly tasks
- Validation status
- Feedback
- Skill progress

FR-30: Logbook shall be accessible to HR and College.

3.1.8 Mid-Term Review

FR-31: System shall allow scheduling mid-term review.

FR-32: System shall allow recording review remarks.

3.1.9 Completion & Certification

FR-33: System shall verify all required skills completed.

FR-34: Student shall submit final report.

FR-35: Student shall complete final presentation.

FR-36: Mentor/HR shall provide final rating.

FR-37: System shall issue certificate upon approval.

FR-38: Certificate shall include:

- Role
- Rating
- Skill summary

FR-39: System shall update club points upon completion.

3.2 External Interface Requirements

3.2.1 User Interface

- Dashboard view per role
- Filter & sorting for student progress
- Internship lifecycle tracker
- Skill validation screen
- Calendar scheduling UI

3.2.2 Hardware Interfaces

None specific beyond standard web/mobile devices.

3.2.3 Software Interfaces

- Assessment Engine API
- Certification Service API
- Notification Service API

- Storage Service API
- User Service API

3.2.4 Communications Interface

- REST APIs (HTTPS)
- Email notifications
- In-app notifications

3.3 Performance Requirements

PR-1: Eligibility filtering shall return result in < 2 seconds for 10,000 students.

PR-2: Evidence upload shall support files up to 50MB.

PR-3: Interview schedule generation shall complete in < 5 seconds for 500 candidates.

3.4 Logical Database Requirements

Entities required:

- User
- Student
- Company
- College
- Internship
- ScreeningCriteria
- Application
- AssessmentResult
- InterviewResult

- SkillInstance
- Task
- Evidence
- WeeklyLog
- Certificate

3.5 Design Constraints

- Must maintain strict RBAC enforcement
- No skill shall be marked completed without mentor validation
- Audit log mandatory for:
    - Skill approval
    - Score override
    - Certification issuance

3.6 Software System Attributes

3.6.1 Security

- Role-based access control
- Organization-level data isolation
- Evidence access restrictions
- Encrypted file storage

3.6.2 Reliability

- Skill validation must be atomic
- Certification issuance must be transactional

3.6.3 Maintainability

- Capability framework modular
- Internship configuration decoupled from execution engine

3.6.4 Scalability

- Must support multi-industry deployment
- Must handle 1000+ skills per functional group

4. SYSTEM STATE TRANSITIONS

4.1 Internship Status

Draft
→ Published
→ Screening
→ Assessment
→ Interview
→ Offer Issued
→ Active
→ Mid-Term
→ Final Evaluation
→ Completed
→ Certified

4.2 Application Status

- Applied
- Shortlisted
- Interview Scheduled
- Selected
- Rejected
- Offer Extended
- Offer Accepted
