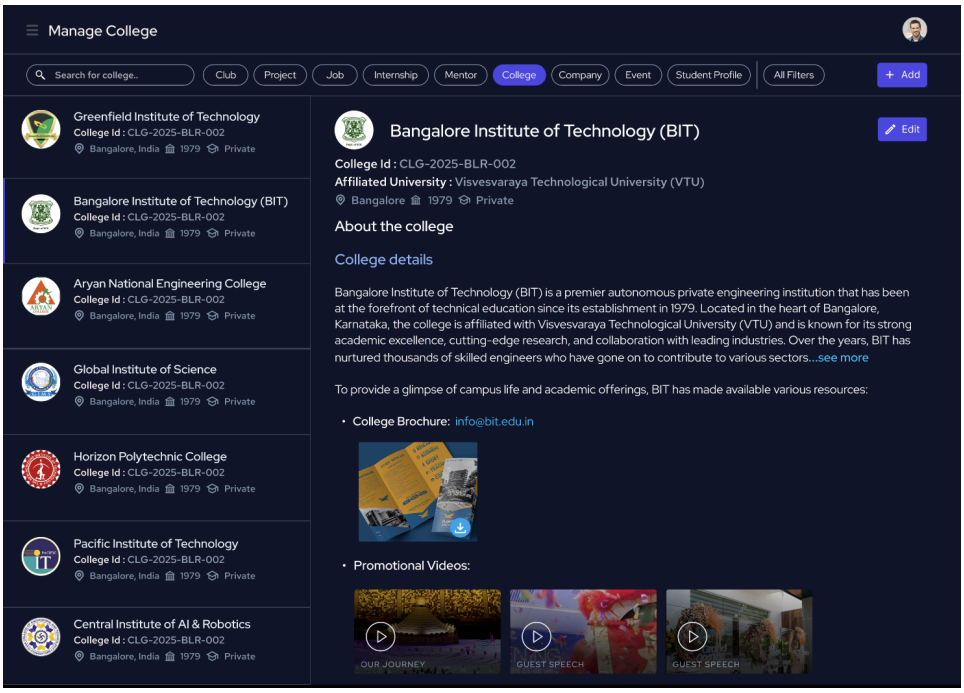
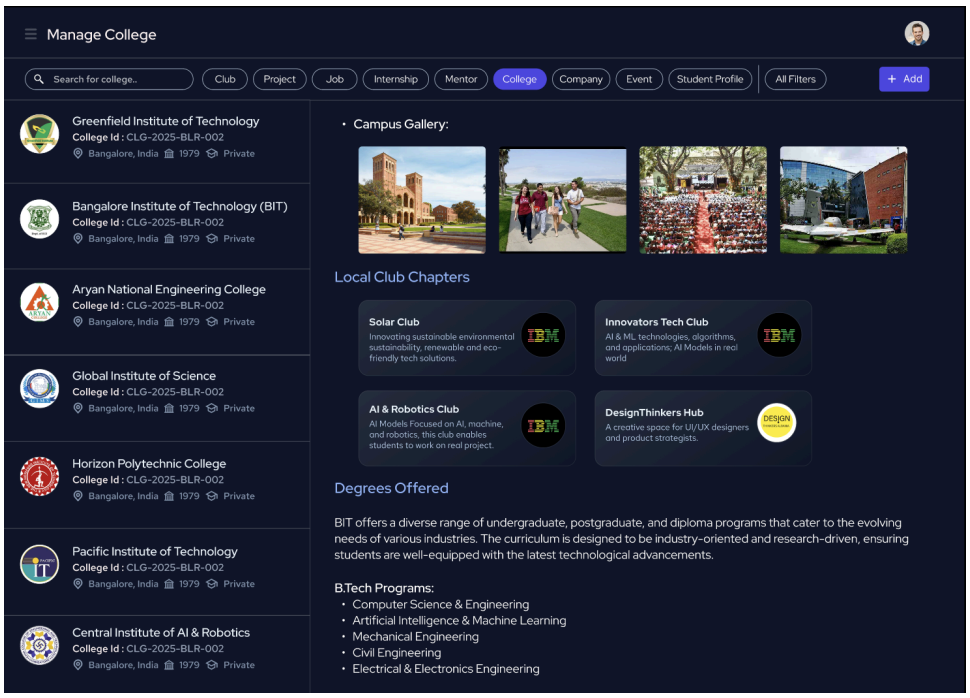
📘 FUNCTIONAL SPECIFICATION DOCUMENT

Module: College Management & Student Onboarding

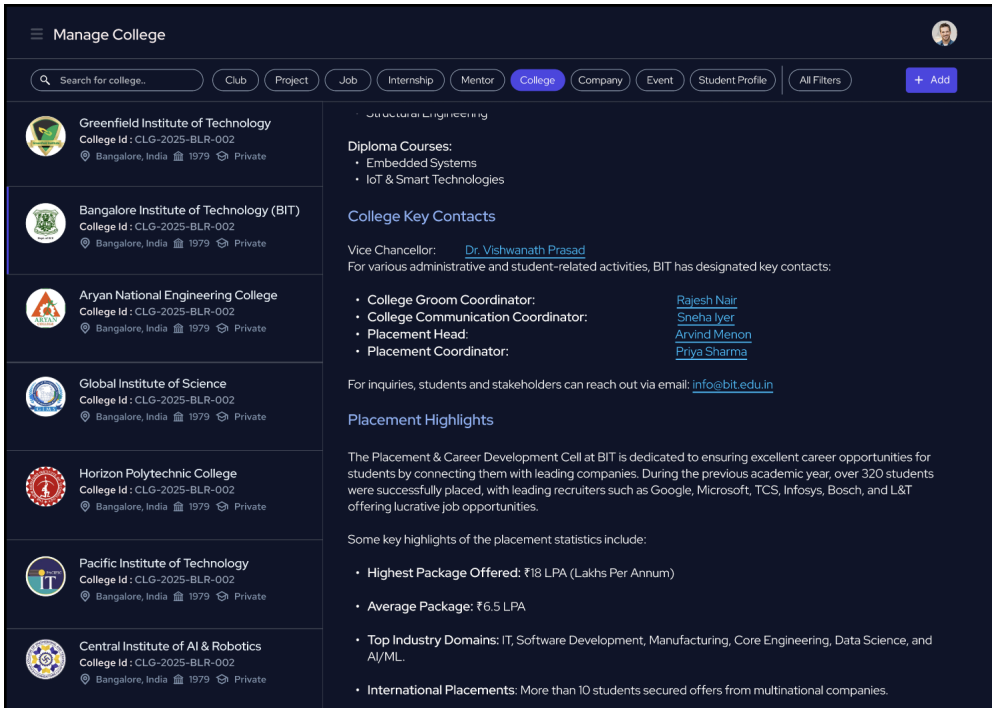
System: Whizard Admin Platform
Version: 1.0



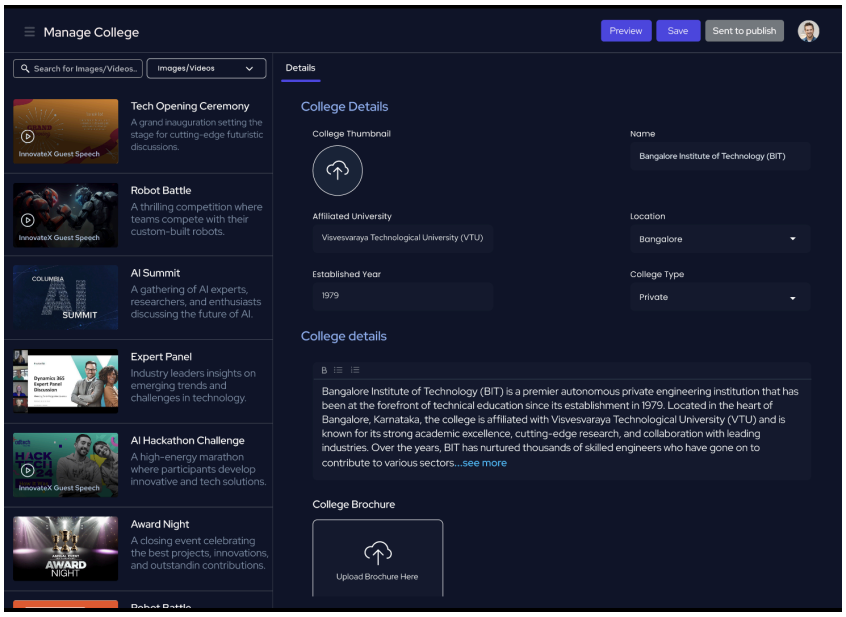
Screen 1 – View College



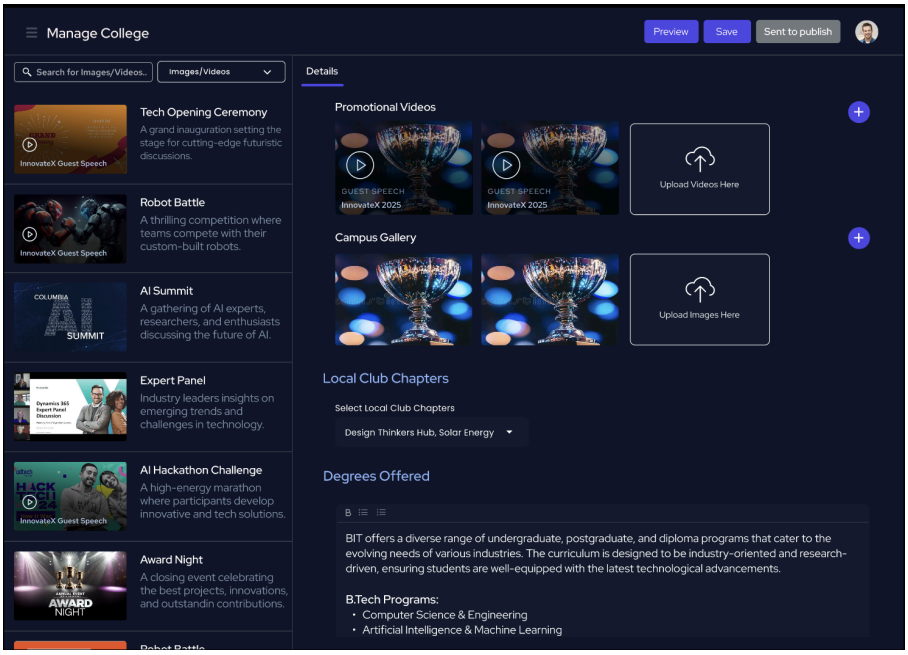
Screen 2 – View College, Scrolled down



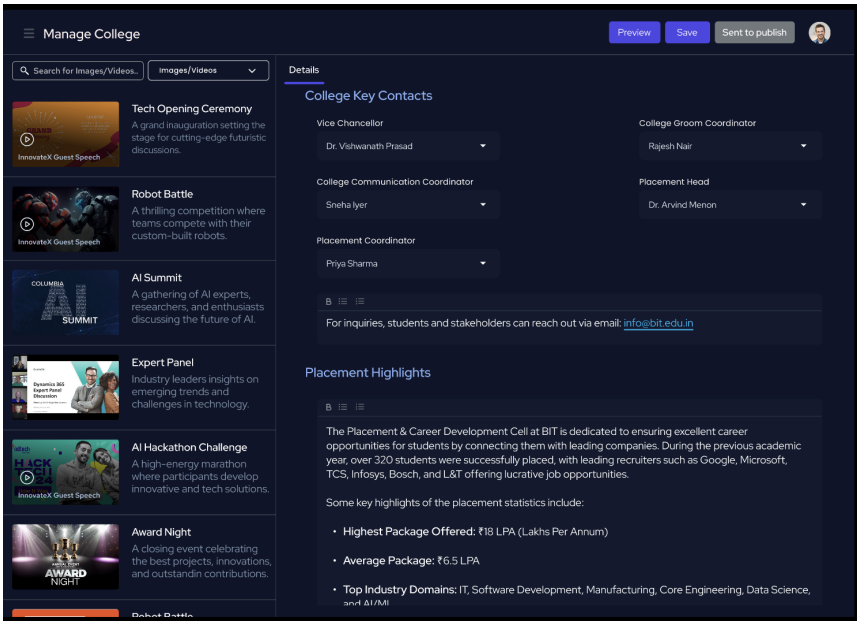
Screen 3 – View College, Scrolled down



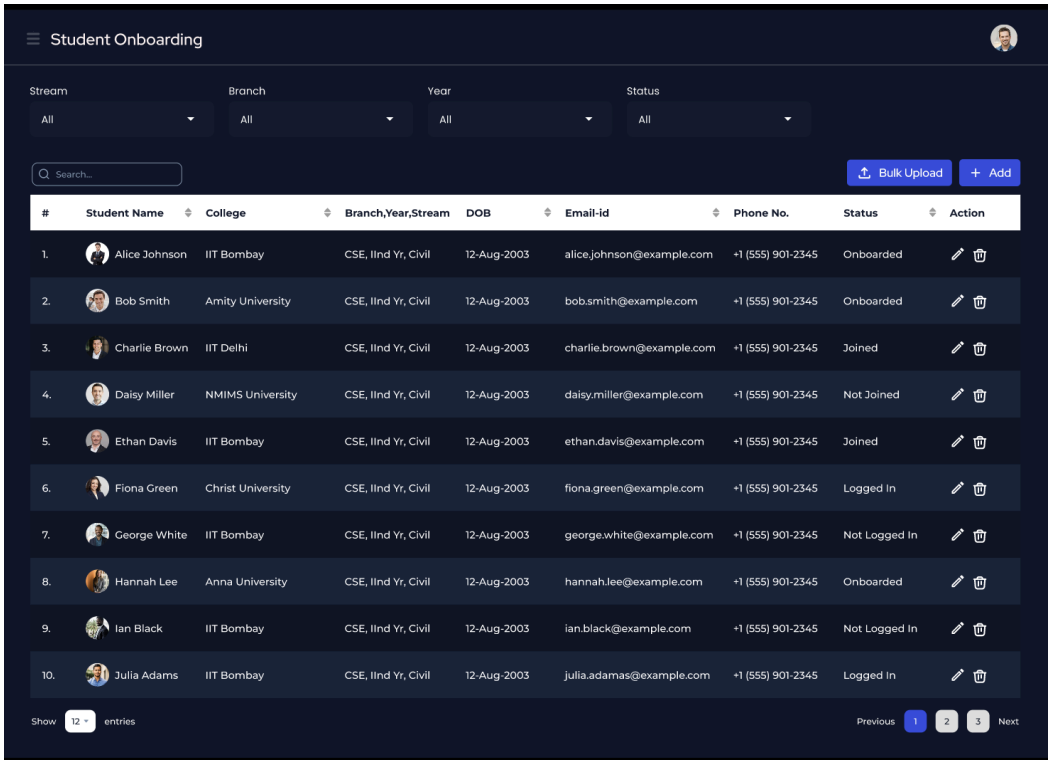
Screen 4 – Create College



Screen 5 – Create College, Scrolled down



Screen 6 – Create College, Scrolled down



Screen 7 – Student Onboarding at College

1. INTRODUCTION

1.1 Purpose

This document defines the **functional behavior, use cases, and user stories** for:

- College View Module
- College Create/Edit Module
- Student Onboarding Module

It converts UI screens and business intent into **clear system behavior and product logic**.

1.2 Scope

The system enables:

- **Whizard Super Admin** → Create & manage colleges
- **College Admin** → Manage their college + onboard students

The platform acts as a **college discovery + marketing + operational system** for students, companies, and institutions

1.3 Actors

Actor	Description
Whizard Super Admin	Global admin who can create/edit all colleges
College Admin	Admin restricted to a specific college
End User (Read-only)	Students / Companies viewing college data

2. SYSTEM OVERVIEW

The College Module has 3 major functional areas:

1. **College Listing & View**
2. **College Creation & Editing**
3. **Student Onboarding & Management**

3. FUNCTIONAL MODULES

3.1 MODULE 1: COLLEGE VIEW

3.1.1 Screen Behavior Summary (Screens 1–3)

Layout:

- **Left Panel:** College list
- **Top Bar:** Search + Filters + Add Button
- **Right Panel:** Selected college details

3.1.2 Functional Requirements

FR-1: College Listing

- System shall display list of colleges
- Each college card shows:
    - Name
    - Logo
    - Location
    - Establishment Year
    - Type (Private/Public)

FR-2: Search & Filter

- User can search by college name
- Filters available (future extensibility):
    - Club
    - Project
    - Job
    - Internship
    - Mentor
    - College
    - Company
    - Event

FR-3: College Selection

- Clicking a college:
    - Loads full details in right panel
    - Highlights selected item

FR-4: College Detail View

Section A: Basic Info

- College Name + Logo
- College ID
- Affiliated University

- Location
- Establishment Year
- Type

Section B: About College

- Rich text (collapsed by default)
- “See More” expands full content

Section C: Brochure

- Multiple PDF uploads
- Click → opens/downloads file

Section D: Promotional Videos

- Video thumbnails
- Play interaction

Section E: Campus Gallery

- Image grid display

Section F: Local Club Chapters

- List of associated clubs
- Click → navigates to club page

Section G: Degrees Offered

- Rich text content
- Includes:
    - B.Tech
    - M.Tech
    - Diploma
    - PhD

Section H: Key Contacts

- Roles:
    - Vice Chancellor
    - Groom Coordinator
    - Communication Coordinator
    - Placement Head
    - Placement Coordinator

Section I: Placement Highlights

- Rich text including:
  - Highest Package
  - Average Package
  - Domains
  - Recruiters
  - International placements

3.1.3 Use Case

UC-1: View College Details

Field	Description
Actor	All Users
Trigger	User clicks college
Flow	Load data → render sections
Outcome	Full college profile displayed

3.1.4 User Stories

- As a student, I want to explore a college before applying
- As a company, I want to evaluate a college before hiring
- As an admin, I want a structured and rich college profile

3.2 MODULE 2: CREATE / EDIT COLLEGE

3.2.1 Screen Behavior (Screens 4–6)

- Triggered by:
  - "Add" → Create Mode
  - "Edit" → Edit Mode

3.2.2 Functional Requirements

FR-5: Basic Details

Field	Type
College Logo	Image Upload
Name	Text
Affiliated University	Dropdown/Text
Location	Dropdown
College Type	Dropdown

Established Year Number

FR-6: College Description

- Rich Text Editor
- Supports:
    - Bold
    - Lists
    - Formatting

FR-7: Brochure Upload

- Multiple PDF uploads

FR-8: Promotional Videos

- Upload multiple videos
- Preview available
- Add via “+”

FR-9: Campus Gallery

- Multiple image uploads
- Add/remove functionality

FR-10: Local Club Chapters

- Dropdown selection
- Linked to pre-existing clubs

FR-11: Degrees Offered

- Rich text input

FR-12: Key Contacts

- Dropdown populated from existing users
- Role-based selection

FR-13: Inquiry Section

- Text field (email/contact info)

FR-14: Placement Highlights

- Rich text input

FR-15: Save & Publish

- Save (Draft)
- Preview
- Send to Publish

3.2.3 Use Cases

UC-2: Create College

Field	Description
Actor	Super Admin
Flow	Fill form → Upload assets → Save
Output	New college created

UC-3: Edit College

Field	Description
Actor	Super Admin / College Admin
Constraint	College Admin only edits own college
Flow	Modify fields → Save
Output	Updated college

3.2.4 User Stories

- As a super admin, I want to onboard new colleges quickly
- As a college admin, I want to update my college profile
- As a platform, I want standardized structured college data

3.3 MODULE 3: STUDENT ONBOARDING

3.3.1 Screen Behavior (Screen 7)

Layout:

- Filters on top
- Table below
- Bulk upload + Add button

3.3.2 Functional Requirements

FR-16: Filters

Filter	Type
Stream	Dropdown
Branch	Dropdown
Year	Dropdown
Status	Dropdown

FR-17: Search

- Search by student name

FR-18: Student Table

Columns:

- Name
- College
- Branch/Year/Stream
- DOB
- Email
- Phone
- Status
- Actions

FR-19: Add Student

- Manual entry via form

FR-20: Bulk Upload

- Upload predefined format
- Validate structure

FR-21: Edit Student

- Update details

FR-22: Delete Student

- Soft delete (archive)

FR-23: Pagination

- Page navigation

- Configurable entries per page

3.3.3 Use Cases

UC-4: Onboard Students (Bulk)

Field	Description
Actor	College Admin
Flow	Upload file → Validate → Save
Output	Students created

UC-5: Onboard Students (Manual)

| Flow | Add → Save |
| Output | Single student added |

UC-6: Manage Students

| Actions | Edit / Delete / Search |

3.3.4 User Stories

- As a college admin, I want to onboard 1000+ students quickly
- As a college admin, I want to edit student details easily
- As a system, I want structured student data for downstream modules

4. ACCESS CONTROL

Feature	Super Admin	College Admin
Create College	✅	❌
Edit College	✅	✅ (own only)
View College	✅	✅
Onboard Students	❌	✅
Edit Students	❌	✅

5. NON-FUNCTIONAL REQUIREMENTS

Performance

- Load college view < 2 seconds
- Bulk upload handles 1000+ records

Scalability

- Designed for all colleges in India

Usability

- Rich media + structured sections
- Minimal clicks for onboarding

Security

- Role-based access control
- Data isolation per college
